Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 47-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowers et al (#4,505,092) in view of Lozeau et al (#3,701,318). Bowers et al show the method and apparatus comprising a first and second film source 320, 322, means for assessing one or more characteristics (length, width and height) of the size of the products, heat sealing 132 and control means to cause a bag to be made based on the sensed conditions. It is inherent that a new bag is produced after the removal of a previous bag as it is cut by knife means 120. Bowers et al do not show the print shuttle means or the remote sensing detections system as claimed. However, applicant concedes that it is well known/conventional to use vision detection/remote sensing systems as indicated on p. 7 lines 5+. Lozeau et al teach the concept of feeding a web to a print shuttle to print on the moving web to precisely print on particular areas of the webs. Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to provide Bowers et al with print shuttle means as taught by Lozeau et al to print on webs in a very precise manner.
3. Applicant's arguments with respect to claims supra have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3721

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

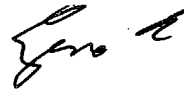

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
